

## **Water/Wastewater Engineer**

Bursich is seeking an experienced water/wastewater engineer for a position as a Senior Project Engineer with the goal to become a managing engineer in our Government Services Division. The position may reside in either our Pottstown office or our Southampton office. The position requires a BS in Civil or Environmental Engineering, a P.E., and 10 or more years experience in the water/wastewater field. Currently the work is more wastewater but would like to be able to expand the water side of this practice.

*Position summary is as follows:*

- Advises and consults with municipal groups in order to represent their best interests;
- Assumes total responsibility for the technical aspects of projects or reviews by leading a team of professionals;
- Possesses detailed knowledge of engineering principles and laws and regulations that apply to public works designs and construction;
- Coordinates project activities;
- Interacts with clients in a professional and positive manner to ensure client satisfaction and return business.
